

Internship Feedback from student

FF: 111

Name of the Student: Harshada Deshpande Year: Final Department : AI & DSDiv/Roll No: 45Name of the Industry: Wolters Kluwer Place: PuneDomain Area of Industry: Software development Period of Internship: July to Dec '25Name and Email id of Industry Supervisor: Mr. Mahesh Shah (mahesh.shah@wolterskluwer.com)A.Y: 2025-2026 Semester: ITitle of the Project: Specialized Legal Intelligence: Developing an In-house LLM for Automated Legal Requirement Extraction using PEFT & Knowledge Distillation
Nature of the work:Problem Statement involved working on fine-tuning LLM models to use the model for company's legal data extraction.

PO statement	Question	Answer each question in terms of levels from 1 to 5 1- poor 2- Average 3- Good 4- Very good 5-Excellent
PO1:- Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.	How much do you feel that you are able to apply learned knowledge in maths, science and Engg. your B. Tech program, to solve complex problems?	5
PO2:-Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first	How do you rate your ability to identify, formulate, review and analyze problems using maths and sciences learned in your course?	5

principles of mathematics, natural sciences, and engineering sciences.		
PO3:-Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.	How much you consider suitable for design and development of solutions to complex problems for society?	4
PO4:- Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.	Kindly rate your ability to conduct investigation on research knowledge and methods to provide conclusions on complex problems?	4
PO5:- Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.	How much you are able to apply, use, understand, the modern engineering and IT tools for predictions and modeling engineering solutions?	5
PO6:- The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.	How you rate your ability to apply reasoning about professional engineering practices for the societal issues?	4
PO7:- Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and	How much you are able to understand impact of engineering solutions on the environment?	5

demonstrate the knowledge of, and need for sustainable development.		
PO8:- Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.	Rate your behavior of following professional ethical practices.	5
PO9:- Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.	How you fits as an individual into a team framed for multi-disciplinary project?	4
PO10:- Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.	How you rate your ability to communicate with engineering community and society?	4
PO11:- Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.	Rate your overall ability to manage engineering projects including finance.	4
PO12:- Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.	How do you evaluate your lifelong learning ability in the context of technological change?	5
PSO1:- Solving real-world problems with the application of Artificial Intelligence and Data Science concepts, theory, and algorithms that adequately meet the challenges of the present and future.	Rate your ability to solve real-world applications based on your projects	4

PSO2:- Ability to develop advanced knowledge and skill sets to innovate technological tools and techniques with optimal use of resources and infrastructure in a competitive environment.	Rate your ability to develop a skill set that suits the needs of the project and any toolset used	5
PSO3:- Exhibit proficiency in computational knowledge and project development using Artificial Intelligence and data science techniques and tools for effective use in analysis, design and development in a multidisciplinary set-up.	Rate your proficiency in project development	5
PSO4:- Develop high-quality research and development aptitude for generation of knowledge and innovative business solutions which are socially and ethically acceptable and recognized by the industry and academia.	How well do you evaluate your self in research and development based knowledge?	5
